MEMORANDUM TO THE FILE

RE: Office of Scientific Intelligence

In reading the account of OSI I noticed that an inspection of the office had been recently made by the Inspector General. Apparently some of his findings were such that the DCI felt it necessary to call the attention of IAC to what was apparently lack of cooperation from parts of some of the other agencies.

I thought it would be useful to see this report from the point of view of the historical study. The Inspector General is abroad and the matter ~~was~~ referred to the DDM. Mr. Becker feels that the matter is ~~so~~ sensitive, that he wished to keep the report under wraps. I did not press the matter as I felt I should not get very far but in due course the matter may have cooled off and be available for examination by the Chief of the Historical Project.
